Regular Dealers Price Guide No. 1000

UNTIL VICTORY IS WON

Government restrictions, priorities, and scarcity of critical materials make it impossible for "business as usual". Some items must necessarily be temporarily discontinued or substitutions accepted.

Our Catalog No. 1000 includes our complete line of building materials though at times we may be unable to supply all items due to war conditions. We will do our best to serve you, and if the items you require are not available we will notify and try to arrange substitutions.

Our task as Americans is to cooperate and unite our efforts—until Victory is won.

YOUR PROTECTION

Our woodwork is guaranteed to be of good material and workmanship. Natural variations in color or texture of the wood are not considered as defects. The quality is safe-guarded while it is in our possession.

For the benefit of the purchaser we request that our products be given careful treatment after they leave our warehouse. They must **not** be stored in damp warehouses or placed in moist or freshly plastered buildings. They must **not** be subject to abnormal heat or dryness. They must be properly finished and the top and bottom edges of solid and veneered doors must be thoroughly painted or varnished. We will not be responsible for defects resulting from neglect of these precautions.

We suggest, to minimize warping and shrinkage, that all exterior millwork be treated with Wood Life Toxic Waterproof Preserver. To complete the waterproof seal brush all cut ends on the job with Wood Life.

Our guarantee does not include any charges for finishing or installing replaced woodwork and is not effective if repair or replacement is made without first obtaining our consent.

Factory Shipment

Rezo Door

Facts About REZO Doors

A. Wide top and bottom rails are of sufficient width to permit cutting down 2" in height—cut equally from top and bottom.

B. Vent openings or exits for ventilation and as an equalizer for temperature and humidity. Each cell is thus ventilated. No hollow door will prove satisfactory that has the air pocketed in the door.

C. Core mesh standards are 2" x 2",

2" x 4", 4" x 4", 1" x 1" according to architectural requirements.

D. Edge strips can be faced with hardwood to match faces. **Standard door edges are pine.**

E. Lock area both sides. 4 $\frac{5}{8}$ " x 20" insures ample lock space no matter how door is hung.

F. Woven-wood core overlaid with plywood two sides. Face veneer of any wood desired.

Rezo Doors are Prefit—Sanded—Individually Paper Wrapped.

Overhead Craw-Fir Garage Doors

PREFITTED — WEATHERSTRIPPED — TREATED

No. 38—1 $\frac{3}{8}$ " Thick
8'-0" x 7'-0" Only

No. 39—1 $\frac{3}{8}$ " Thick
8'-0" x 7'-0" Only

ONE UNIT

Craw - Fir - Dor is available in one compact unit — two factory-drilled fir doors and one carton of hardware with complete instructions for easy installation.

All parts are pre-drilled for 8' x 7' openings and one man can set the doors up alone in two hours — less if he is a skilled workman. No expensive technical installation crew is necessary with Craw-Fir-Dor.

Once installed, the door operates quietly without pushing or tugging — a touch of the finger and the door slides up and out of the way.

Steel weatherstrips are mounted on each side of the door and jamb and provide a weathertight closure. This prevents rattling, warping, or sagging.

Also a fine Cylinder Lock as part of the Standard Equipment.

WOOD CASEMENTS

COMPLETE WINDOW UNITS

Frame . . . Sash Glazed SSA, Wood Munts . . . Weatherstrips . . . Hardware . . . Wood Frame Screen . . . Double Glass . . . Treated . . . Fitted . . . Adjusted . . . Ready to Install. Choice of Operating Hardware either Rotogear or Bar Type available. Please specify when ordering.

The outswinging Andersen Casement Window is the first casement to successfully combine the weathertightness of wood construction with the simple, narrow-line beauty of metal. The classic lines of Andersen Casements blend harmoniously with any type of architecture and lend distinction to any interior.

Because of their exceptional weathertightness, Andersen Wood Casements meet the exacting requirements of ideal air conditioning and winter heating. Special frame construction stops air leakage around sash and frame. Removable double glazing reduces heat loss through the glass 60%. These features mean year 'round comfort, freedom from dust and dirt and substantial fuel savings.

Complete Units Delivered Assembled and Ready to Install, saving time and labor, Andersen Wood Casements insure weathertight joining with wall in either wood frame or masonry construction.

Andersen Casements are made of clear pine and all wood parts are protected against decay, termites and moisture with Andersen Chemical Preservative Treatment.

Andersen CASEMENT WINDOWS

STOCK SIZES AND LAYOUTS

Sash layout shown is standard. SAME UNITS CAN BE FURNISHED WITH HORIZONTAL BARS ONLY WHEN SO SPECIFIED. Sash also furnished open for one light glazing or for leaded glass panels.

Sash may be either swinging or stationary. All swinging sash open out and may be hinged to swing left or right. Specify numbers of sash to swing in each unit and how hinged as viewed from the outside.

GLASS SIZES—All cut up lights are 8x12 except Units 2310, 4310, 6310, 8310, 10310 which have 8x10 glass, and one light wide units which have 12x12 glass. All muntin bars $\frac{3}{16}$ " between glass.

Wider or higher units using standard sash can be furnished on order.

(Note: Center sash always stationary, only end sash can ventilate.)

Extras for extension jambs, hardwood stops, etc., quoted upon request.

Andersen Picture Units only manufactured in sizes and designs as listed.

Andersen

HORIZONTAL GLIDING WINDOW

CLOSED—The sash are in the same plane. Looks much like a casement window.

OPEN—The sash glide past each other horizontally. Operating equipment is simplicity itself—just two steel glides at the bottom of each sash and two guide pins at the top plus a three way lock and operating handle on one sash.

A COMPLETE UNIT

Ideal for modern, low cost homes and wherever modern fenestration with wide glass areas is desired. The perfect window for enclosed porches and summer homes. Weatherstripped, toxic treated and complete with screen and removable double glazing as optional equipment.

OUTSTANDING FEATURES

Quickest Installation of Any Unit. Set frame in opening, screw head and sill tracks in place, put sash in place, apply inside stops.

Sash Come Out Like Tins. Just lift up and swing out. Replace the same way. Cleaning is easy.

Double Glazing can be quickly taken off for cleaning and replaced from the inside. Usually left on the year 'round.

NOTES

Layout shown at top is for standard cut up lights.
Layout shown below for horizontal lights.

Each opening consists of a pair of sash. Cannot be furnished with a single sash or with three ventilating sash in same opening due to method of construction. For widths narrower than minimum shown, use Andersen Casement or NARROLINE Units.

Openings shown are all singles. Multiple openings can be furnished using standard 2 $\frac{3}{4}$ " wide mullion center posts between pairs of sash. To arrive at rough stud opening size for a mullion unit, double the corresponding single sash opening and add 5 $\frac{3}{4}$ ". Masonry openings with 2 inch exterior casings are one inch wider than rough stud openings.

Andersen

HORIZONTAL GLIDING WINDOWS

Following Unit Prices Include:

FRAME

W. P. Pine, K-D, with 1½" x 2" (No. 908) exterior casing. All treated with Andersen Chemical Preservative. Carton packed. No water drip.

Andersen

NARROLINE

DOUBLE HUNG WINDOW

A COMPLETE UNIT • READY TO INSTALL

Frame — Window — Weatherstrips
Counterbalancing Equipment

WEATHERSTRIPPED

Maximum Weathertightness and easy sash operation is assured by the new duplex action Silver-Seal weatherstripping has both rib and spring metal contacts. The sash slide smoothly at all times because they are guided by the ribs and are centered between the spring-leaf weatherstrips.

COUNTER-BALANCED

To provide easy and unfailing sash operation, the time-tested principle of weight counterbalancing has been retained. The space required for weights has been greatly reduced by the use of a specially designed weight with pulley wheel which replaces two ordinary weights.

Andersen noiseless and wear-proof pulleys and steel sash chain that will not break or wear out insure a lifetime of satisfactory and trouble-free sash operation.

LEAKPROOF

The Andersen Leakproof Locked-Sill Joint with steep sill slope and chamfered blind stop to insure quick drainage, and the weathertight wide blind stop, make the Narroline Frame Leakproof. The Locked-Sill joint is a patented feature, exclusive with Andersen Master Frames.

NEW ANDERSEN WINDOW

Andersen check rail windows, 1½" thick, glazed SSA and bed puttied, are furnished fitted and ready to install with weatherstrips for check rail and bottom rail applied. New corner joints eliminate exposed end wood at bottom rail.

PRESERVATIVE TREATED

All wood parts are protected against decay and termites by the Andersen Preservative Treatment. Another Andersen "Lifetime" feature.

Andersen

NARROW LINE UNITS No. 680

The following "Unit" prices include K-D Frames with $1\frac{1}{8}$ x 2 inch exterior moulding, no waterdrip, carton packing; Andersen Silver Seal Weatherstrip for head and side of frame packed in window cartons, galvanized sash chain; flat sash weights; Andersen prefit check rail windows, $1\frac{1}{2}$ inch thick, glazed with SSA glass bedded in putty carton packed. For insurance against decay and discoloration all parts of frame and sash are protected with a preservative, moisture-repellent treatment.

Unit prices below are for following window arrangements:

DOUBLE HUNG WINDOW

WEATHER STRIPPED • EASY OPERATING

Detail at left shows installation in typical 2 x 4 frame wall. Note removable inside liner which makes it easy to reduce jamb width for dry built walls and other special construction. Also used in solid masonry walls by adding back liner and inside ground casing.

A highly satisfactory true weight counterbalancing system is provided with critical materials practically eliminated. Sash weights are made of concrete containing iron ore aggregate. High grade sash cord is used in place of sash chain. Pulley wheels are made of self lubricating treated hardwood with axles of "Pyrex" glass mounted in a housing of treated wood. Critical metals ordinarily used for counterbalancing from 28 pounds to approximately 13

ANDERSEN VICTORY UNIT No. 642

(Factory Shipment only)

The following unit prices include K. D. frames with 1½" x 2" exterior casing, no water drip; windows 1½" thick, glazed S.S.B., bedded in putty, prefit; Andersen Silver Seal check and bottom rail weatherstrips applied, hardwood pressure weatherstrips attached to sash stiles, cord fasteners attached; first quality sash cord; flat sash weights; windows carton packed.

Andersen MASTER FRAMES with *Locked Sill-Joint*

7 Distinctive Features

- 1—Tongued joint between head and side casing.
- 2—The patented Lock Sill-Joint.
- 3—Steeper sill slope—3 inch to the foot.
- 4—Chamfered end of blind stop for better drainage.
- 5—Removable inside jamb liner.
- 6—Narrow casings— $3\frac{3}{4}$ inch wide.
- 7—The Andersen Noiseless Wearproof Pulley.

Builders prefer Andersen Master Frames because they are LEAKPROOF and EXCEPTIONALLY ACCURATE. Long life is insured by treating with wood preservative in the important joints and adequate provisions for drainage.

BASEMENT WINDOW

THE BEST BASEMENT UNIT ON THE MARKET

• • •

Also an ideal all-purpose ventilating unit for war dormitories, service buildings, farm buildings, tourist camps, summer cabins, and other low cost construction.

FROM THE INSIDE—Note two open positions in which sash is automatically held. Sash is easily removed when open by simply lifting it out of the frame. The strong lock holds the sash tightly in the closed position.

THE COMPLETE UNIT INCLUDES

Frame—Made of Clear Pine. Mortar clinch grooves provide anchorage and a weather-tight joining with masonry wall.

Sash—Glazed and Factory Fitted. $1\frac{1}{2}$ inches thick. Special design gives large glass area without sacrificing strength.

***Screen**—Factory Fitted. 18 mesh Screen Cloth. Installed in frame at factory.

Hardware—Hinges automatically hold sash securely in two open positions without rattling.

Lock closes sash tightly. Special inside screen fasteners can also be used for storm sash. All hardware parts are cadmium plated.

***Weatherstrips**—Compression type weatherstrips nailed in place on head and side of frame and bottom rail of sash.

Storm Sash—Furnished as an extra—not included in unit price.

* Screens and weatherstrips subject to our ability to furnish.

SIDE

SILL

Detail shows installation in a standard block wall with concrete grouting at sill and sides.

BASEMENT WINDOWS

Kewanee U. S. S. Copper Steel

THE "MASTER" TYPE

"Master" Sash—Inside View, Partly Open
Note: Draft deflected upward

The "Master" is the "best" in basement window construction. A strong frame which will keep its shape; a sash which will open and close easily at all times. Gives deflected ventilation—stays fixed in any position. Forms double weather contact when closed.

Finished with shop coat of metallic paint and includes wire glazing clips.

At Right: "Master" Sash. Outside view—sash open wide giving 100% ventilation.

Made of copper steel. Longer life box frame construction. Easy installation. Anchor fins on each.

THE "STANDARD" TYPE

"Standard" Sash

The "Standard" Type window illustrated at left, has same general "high quality" construction features as the "Master". Made **bottom ventilating only**—held open by chain or cord fastened to ceiling.

Sash can easily be removed from frame.

PRICES—OPEN

Either

"STANDARD" OR "MASTER" TYPES

Wall Opening	Glass Size	Window Open	Screen—16 Mesh
31 $\frac{1}{4}$ x 22 $\frac{7}{8}$	2 Lts.—14 x 20	\$3.72	\$2.52
33 $\frac{5}{8}$ x 14 $\frac{7}{8}$	3 Lts.—10 x 12	3.45	2.22
33 $\frac{5}{8}$ x 18 $\frac{7}{8}$	3 Lts.—10 x 16	3.78	2.34
33 $\frac{5}{8}$ x 22 $\frac{7}{8}$	3 Lts.—10 x 20	3.96	2.58
39 $\frac{5}{8}$ x 20 $\frac{7}{8}$	3 Lts.—12 x 18	3.96	2.64

Above sizes carried in stock for putty glazing. Screens shipped from factory.

BASEMENT WINDOWS

DURO TYPE

"DURO" Window Partly Open

A competitive basement window—built for service yet very reasonably priced. The "DURO" type window is made of rolled steel sections; top ventilating. Sash will remain open in any desired position. Painted with shop coat of metallic paint.

Where low cost is the principal factor—use "DURO".

DURO PRICES—OPEN

Wall Openings	Glass Sizes	Window—Open	Screen—16 Mesh
30 $\frac{7}{8}$ x 22 $\frac{3}{4}$	2 Lts.—14 x 20	\$3.24	\$2.88
33 $\frac{1}{4}$ x 14 $\frac{3}{4}$	3 Lts.—10 x 12	3.09	2.52
33 $\frac{1}{4}$ x 18 $\frac{3}{4}$	3 Lts.—10 x 16	3.24	2.67
33 $\frac{1}{4}$ x 22 $\frac{3}{4}$	3 Lts.—10 x 20	3.42	2.95
39 $\frac{1}{4}$ x 20 $\frac{3}{4}$	3 Lts.—12 x 18	3.48	3.03

Above windows carried in stock. Screens shipped from factory.

SCREENS

16 Mesh Wire—Steel Frames

Screens—16 Mesh Bronze or Galvanized Wire—are available for all three types of Kewanee Basement Windows. Screens for Master and Standard Basement Windows are easily attached in place with latches which fit into slots on the outside of the frame. Screens for "DURO" windows are attached with clamps and screws.

When ordering specify type of window for which screen is desired. Factory shipment only.

KEWANEE COPPER STEEL COAL CHUTE

MORGAN

SECTIONAL KITCHEN CABINETS

PLANNED FOR CONVENIENCE—

The convenient kitchen arrangements shown on this page are but a few of the hundreds of modern labor-saving—step-saving layouts made possible by the use of the Morgan Kitchen Cabinet units shown on the following pages.

The plan shown above is ideal for an average home. It provides, as all kitchens should, a natural route for the preparation of meals from the refrigerator to the sink and work counter to the stove and finally to the dining room table.

100% EFFICIENCY HERE

It is almost impossible to imagine a kitchen plan more efficient in arrangement than the above. Here, indeed, is the most delightful, practical composition of Morgan Kitchen Cabinet units certain to make the preparation of meals and other kitchen work more pleasant and much less arduous.

Morgan Sectional Kitchen Cabinets

UP-TO-DATE, EFFICIENTLY PLANNED AND
BEAUTIFULLY DESIGNED FOR THE
MODERN KITCHEN

A FEW OF THE OUTSTANDING FEATURES OF MORGAN
SECTIONAL KITCHEN CABINETS

Designed to meet all the requirements of the most carefully planned kitchen—Dust-proof, Flexible, Space-saving.

FIR WALL BOARD FIR PLYWOOD

Fir Plywood is an all-wood "ply" board with veneers glued together with a special water-resistant glue. By glueing the veneer so that alternate sheets have their grain running at right angles, the manufacturer capitalizes on the strength of wood along the grain. This also results in plywood being practically immune against expansion and shrinkage. An ideal board for panelling, partitioning, cabinet work and countless other uses.

J. M. Super-Felt Type B Home Insulation

J-M Super-Felt Type B Home Insulation is a pre-fabricated batt of uniform density made of mineral wool and a waterproof binder to one face of which is attached waterproof, vapor-resistant paper with a folded flange $1\frac{1}{2}$ inches wide along each of the long sides of the batt. This backing not only protects the insulation against the penetration of moisture from wet plaster but also serves to resist the infiltration of moisture vapor from the house into the wall. The flange, folded over the stud, offers a convenient method of tacking the batt in place, temporarily, and seals the vertical joints against moisture vapor. Super-Felt batts are furnished in full stud thickness and semi-thick (2 inches) in two sizes, 15 by 48 inches and 15 by 23 inches, designed to fill completely the width between studs, joists and rafters spaced on the usual 16 inch centers.

J-M SUPER FELT HOME INSULATION

Semi-Thik (2-inch Bats), 15 x 48—60 sq. ft. per Carton Per 1000 sq. ft., \$45.00

J. M. INSULATING BOARD

J-M Insulating Board is a grainless, knotless, all-wood fibre board of great strength and a remarkable degree of insulating efficiency. Because of the large units in which it is made (sheets 4'-0" wide by 6'-0" to 12'-0" long) it permits large areas to be covered with amazing speed and economy. Although widely used as a general utility building board because of its ease of application, it is one of the most versatile

and practical of interior finishes for decorative wall and ceiling treatments, in both new construction and modernization. Its smooth Ivory Glazecoat finish, which is durable and easily cleaned, harmonizes perfectly with most color schemes eliminating the need for painting, yet if another color is desired, can be painted without a priming coat.

J. M. Bevel Panels and Bevel Plank Featuring the New and exclusive J. M. "Lightning Joint"

Both of J-M Decorative Insulating Board units, Bevel Panels and Bevel Plank have the improved, new "Lightning Joint", an exclusive J-M feature which not only speeds application but completely conceals all nailing. Concealed nailing is an essential in interior finishes. From the accompanying diagrams, note that each panel is provided with a tongue through which all nails are driven. Then the adjacent panel slips over the tongue, fitting into the socket to make a smooth, tight joint and completely concealing the nail heads.

BATHROOM MEDICINE CABINETS

LAWSON "WARWOOD"

THE NEW VICTORY LINE

Lawson "Warwood" sets the tempo for victory bathroom cabinets today. Complete in every detail. Their smart styling, beauty and sound construction are consistent with Lawson's World Famous quality cabinets. "Warwood" Cabinets are made of select quality hardwoods and assembled by expert cabinet makers. All joints are lock type, securely nailed and glued with a water-proof casein glue. This sturdy construction will withstand many years of hard usage.

Finish—"Warwood" cabinets are finished with a high quality, triple coated, white enamel which will resist moisture and assure a beautiful and lasting finish.

No. 1799

No. 1799

This full Venetian Model, with graceful bow top, has a beautiful plate glass mirror with beveled edge and attractive engraving. The mirror is held to door by metal clips. Cabinet has three adjustable bulb edge glass shelves—razor blade discard slot—positive spring type door catch—bar type sliding door stop—sturdy piano type hinges. Specifications on opposite page.

No. 1777

A rectangular design, full Venetian Cabinet, ideal where simplicity combined with fine appearance is desired. The mirror is plate glass with beveled edge and restrained engraving. It is held to door by metal clips. The cabinet has three bulb edge, adjustable glass shelves—razor blade discard slot—positive door catch—bar door stop—sturdy piano type hinges. Specifications on opposite page.

No. 1777

No. 54

No. 54

A beautiful, framed model, with perfectly plain plate glass mirror . . . creates an impression of class and fine styling. The frame is of bright steel, electrolytic zinc plated, and clear lacquered. Cabinet is equipped with bar type door stop—positive door catch—sturdy piano type hinges—razor blade discard slot. Specifications on opposite page.

BATHROOM MEDICINE CABINETS

LAWSON "WARWOOD"

THE NEW VICTORY LINE

No. 2675

No. 2675

A medium priced cabinet of interesting design. The beveled edged, attractively engraved mirror is crystal glass, held to door by metal clips. The cabinet has bar type door stop, positive door catch, razor blade discard slot, piano type hinges.

No. 1445

No. 1619

An attractive low priced cabinet. White enameled steel frame holds plain double strength mirror to door. Adjustable bulb edge glass shelves—razor blade drop—positive type door catch—flat bar type door stop—sturdy butt hinges.

No. 1619

No. 1445

Same as above except with full venetian double strength window glass mirror with straight line decoration.

No. 294

A surface type cabinet for mounting on outside of wall. Mirror is plate glass with floral engraving. Shelves are double strength glass. Door is hinged on two sturdy butt type hinges.

No. 294

No. 144

Same as above except with double strength window glass mirror.

WOOD LIFE TOXIC WATERPROOF PRESERVER

PRESERVES WOOD—PREVENTS DECAY
PREVENTS WARPING

Wood Life is a clear solution which prevents warping, swelling and all forms of decay and rot, including blue stain, thus guarding against splitting, checking, and grain raising. A dip of three (3) minutes is sufficient for the solution to penetrate deeply into the wood, thus making the treatment a permanent proposition.

If wood has started to rot Wood Life treatment will stop the rotting process. Dipping in this solution is recommended for all exposed lumber parts of new buildings. Treatment of inside trim insures a tighter mitre joint by minimizing expansion and contraction.

PROTECTION CEMENT WATERPROOF PRESERVER

Cement Waterproof Preserver is used best by spraying on cement, stucco, brick or walls of similar material. Stops leaking, and sweating. This clear solution does not seal the surface and is not advised where concentrated pressure exists. It is for the average condition of moisture and water absorption into basements and walls of buildings. Coverage ranges from 90 sq. ft. on cement walls to 500 sq. ft. on brick or tile.

SHINGLE STAIN

Wood Life Perfect Shingle Stain is a combination of the solution of Wood Life Preserver with Concentrate Color Pigments ground in oil. A pint of these color pigments is mixed with a gallon of Wood Life Preserver giving one and one-eighth gallons of Shingle Stain. The Color Units come in five colors: Tile Red, Forest Green, Seal Brown, Walnut Brown, and Buff Yellow.

Wood Life Shingle Stain is not just a surface covering but penetrates deeply into the wood.

STORMY WEATHER WATERPROOFING FOR CANVAS

Keeps out water, but not air. Preserves without closing the pores.
